

"A film this breathtaking and endearing should be seen by everyone.

Its themes include civil rights, women's rights, Native American issues, and preserving our environment.

It speaks to the importance of science and engineering while underlining the power and the beauty of sharing important ideas through art."

A Film by Bill Muench

*The Artist & the Astronaut* tells the unlikely love story between the artist Pat Musick, a civil rights activist, and the Apollo astronaut Jerry Carr as they participate in some of the most historic events in human history.

The film is filled with never-before-seen footage of the early space pioneers and features interviews with key figures from that era. It chronicles Pat and Jerry's vastly different paths as they traverse uncertain times, eventually coming together to render some of America's most enduring art. *The Artist & the Astronaut* is an uplifting love story proving that curiosity, perseverance and empathy for others can be powerful agents of change.

Pat has made art her entire life. As the world changed in the 1960s and 1970s, her art also changed to reflect the times.

Jerry's only dream was to fly. But he never imagined that his dream of becoming a pilot might one day take him to space.

Screenings are perfect for :  
clubs and organizations, museums,  
retirement communities, community cinemas,  
film schools, music schools, and businesses.

Bill and Todd share their expertise on how to make an award-winning independent film.

The conversation often includes interesting behind-the-scenes stories about the space program. They are occasionally joined by other experts.

Great fundraiser for your organization!!
